## SUMMARY

Passionate about programming since the 6th grade, I've always tried to use my problem solving skills to make other people's lives easier. Even though I started my career in the mainframe days, my curiosity always led me to the latest technology. For me, becoming a Full Stack Web Developer is just part of that journey.

## SKILLS

**Front-End:** React, jQuery, HTML5, CSS3

**Back-End:** JavaScript, Node.js, Git, GitHub, NPM, PostgreSQL

## RECENT PROJECTS

**Stay Informed** | [Link](#) September 2019

- An app designed to help users find information on their congressional representatives by address. Implemented using 5 different APIs (Google Civic Api, ProPublica API, OpenSecrets API, United States Images Github, and NewsAPI.org).
- Using Agile methodology, I worked on a team of 5 to design, implement, and code and full-stack React/Express/Postgres mobile-first app.

**Spaced Repetition** | [Link](#) August 2019

- An app designed to help users learn a new language using the spaced repetition technique. Implemented a modified linked list to use the spaced repetition learning technique.
- Worked in a team of two to create mockups, wireframes, and build a full-stack app to meet provided test specifications.

## EDUCATION

**THINKFUL** | Engineering Immersion September 2019

- Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, jQuery, Node.js, React, Redux, and algorithms and data structures.
- Created and deployed mobile-first applications while learning new languages and frameworks by collaborating several hours with a senior web developer every week.

**Dev Bootcamp** | New York, NY December 2016

- 19-week intensive training program specializing in Ruby, Rails, HTML5, CSS, and Test Driven Development.
